

What's New in v19.1

DP2 v19.1 contains the following features:

- Added script overrides for Printer Queues, Printers, Tasks, and Open Orders. (The file names are PrinterQueuesDoc.txt, PrintersDoc.txt, Tasks.txt, and OpenOrderDoc.txt.)
- Improved the DP2 Installer to allow multiple instances of the same version of DP2 on a workstation. See "Register DP2 with Windows" in [Using the New Installer](#) for more information.
- Improved the performance of DP2 upgrades.
- Added the ability to use Australian, New Zealand, and Canadian addresses in the Customer Data table.
